

ASMoto  
DashBoard TFT  
Wiring diagram 1.2  
2021 [www.asmoto.eu](http://www.asmoto.eu)  
ASMoto Race Electronics

CH 1 - CH 4 0-5V analog or digital input

CH 5 - CH 8 Internal 2.2 kOhm pull up resistor, for temperature sensor, or switch, or etc.

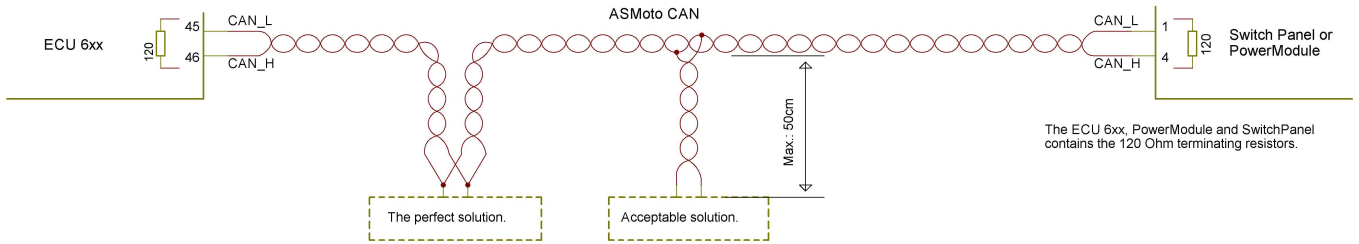

CH 5: Switchable 33 Ohm pull up resistor, for generator DF

CH 8: Switchable 100 Ohm pull up resistor, for fuel level sensor

CH 9 - CH 12 Internal 2.2 kOhm pull up resistor, for temperature sensor, or switch, or etc. or configurable low side output.

Green marked with the remappable input / output

## ASMoto CAN Bus Wiring Requirements:

Other devices connected to the CAN bus. Eg.: DashBoard, DataLogger, Data link connector, and etc...
